Professional Summary

Senior backend engineer with 7 years of professional experience designing and operating high-traffic Python services. Comfortable owning systems end to end, from API design through Docker packaging, AWS deployment and on-call support.

Technical Skills

Languages: Python, JavaScript, SQL

Backend: Django, FastAPI, REST APIs, microservices, GraphQL

Databases: PostgreSQL, Redis, MongoDB

Cloud & DevOps: AWS (EC2, S3, IAM, Lambda), Docker, Kubernetes, Terraform, CI/CD

Tooling: Git, GitHub Actions, Jenkins, pytest, Postman, Grafana, Prometheus

Practices: Agile, code review, test driven development, observability

Work Experience

Senior Software Engineer | NovaTrail Systems | 2021 - Present

- Designed and built a payments orchestration platform in Python and FastAPI serving 12 million REST API requests per day across 14 microservices
- Migrated the primary PostgreSQL cluster to partitioned tables and rewrote the slowest queries, cutting p99 API latency from 840ms to 190ms
- Containerised 20 services with Docker and deployed them to AWS EKS using

Terraform managed infrastructure

- Built GitHub Actions CI/CD pipelines running unit and integration tests, enabling the team to deploy 8 times per day with automated rollback
- Mentored 4 junior engineers and ran the weekly technical design review

Software Engineer | Kestrel Analytics | 2018 - 2021

- Built Django REST services backing a customer analytics product used by 300 **enterprise accounts**
- Introduced pytest based automated testing, raising coverage from 22% to 81%
- Moved batch jobs from cron on EC2 to containerised workloads on Docker
- Worked in a Scrum team and took part in on-call rotation and incident reviews

Projects

Distributed Rate Limiter

- Redis backed distributed rate limiter library in Python, used across all internal microservices, published as an internal package with full test suite

Observability Dashboard

- Prometheus and Grafana dashboard tracking latency, error rate and saturation for every service, reducing mean time to detection from 25 to 6 minutes

Education

Bachelor of Technology in Computer Science, Indian Institute of Technology Madras, 2018

Certifications

- AWS Certified Solutions Architect - Associate
- Certified Kubernetes Application Developer (CKAD)

Achievements

- Speaker at PyCon India 2023 on scaling Python services
- Reduced infrastructure cost by 34% through right-sizing and autoscaling
